PURGIT MOBILE FLARE SYSTEMS

- Enclosed Combustors and open flares available for all environmental permitting requirements
- Gas assisted and air assisted flares available
- Fittings and hoses for all applications
- All flares fitted with automatic pilot systems and multiple layers of safety
- Compliant with all state, federal, and Coast Guard regulations
- Skid-mounted knock-out tanks (500 gal to 3000 gal), specialty liquid transfer pumps, and vapor blowers available to facilitate dozens of different applications
- Cryogenic rated SS vaporizers
- Pipeline pigging, railcar and pressure vessel purging
- Anhydrous ammonia tank decommissioning

Sales, Service and Rental

PURGIT operates a turn-key mobile flaring service for sites all over the United States. This service group also operates a variety of cryogenic rated vaporization equipment and liquid nitrogen tankers. Our Project coordinators have over three decades of experience and can offer consulting support for any pipeline or vessel commissioning or decommissioning.
